Topic: "Sustainability"

Hospitals strive to provide an optimum healthcare environment that not only contributes to quality patient care, but must also consider revenue generation, regulatory compliance, improving operational performance, recruiting and retaining staffs well as other hospital objectives. As a result, hospitals are adopting green strategies and more sustainable practices in an effort to:

- Enhance patient health and well-being
- Reduce energy costs
- Improve air quality
- Increase building efficiency
- Provide for faster patient recovery time
- Achieve operating cost savings
