HEALTH CARE CONSTRUCTION SUMMIT

Tuesday, May 27, 2008

How To Profit From the Coming Health Care Construction Boom

What's It All About?

Over \$100 billion will be spent on healthcare construction in California in the next ten years. A specialty-prepared workforce is critical to everyone's success. Employers, Building Trades, Contractors, Subcontractors, OSHPD, the California Hospital Association, and the Labor and Workforce Development Agency, established a public-private partnership to discuss training opportunities and changing trends in the industry to ensure we all succeed. The public private initiative is an ongoing process, starting with the Northern California Summit followed by a second summit in Southern California in fall 2008.

Who Should Attend the Summit?

General Contractors and Specialty Subcontractors interested in health care construction, labor and trade representatives in specialty trades, and employers involved in healthcare construction, are encouraged to attend.

When?

Tuesday, May 27, 2008
