

Mechanic Evaluation and Certification for Healthcare

Study Materials

There are many good reference materials available in bookstores and libraries. Your facilities management department may have some excellent materials in the form of manufacturer's specifications, installation guides, and service books.

The following list of references is not an endorsement, nor does it constitute a complete list of text and reference materials available. It is offered to you so that you can start looking for material that you can use to answer questions and gain background knowledge for the work you do. For current text, handbooks and other publications, contact any of the following popular textbook publishers:

American Technical:	www.go2ATP.org
Delmar:	www.delmar.com
Goodheart-Willcox:	www.goodheartwillcox.com
