

National Environmental Healthcare Services Manager

SBM, an international facilities services company, is searching for a Healthcare Service subject matter expert for our national Healthcare Environmental Services (HES) program. If you are a proven manager with experience in HES product development, delivery, management, sales and marketing, and if you are eager to help grow our business, please apply online today!

POSITION OVERVIEW

As the **National Environmental Healthcare Services Manager** you will be responsible for the coordination of all Operations activities for our HES accounts and will work closely with our Regional and National Business Development Team members to execute strategic growth initiatives. Serving as the subject matter expert, the manager will assist in the development and maintenance of existing HES contracts. To succeed in this role, you will need to be a creative, hard-working, entrepreneurial individual who has the ability to think expansively and work independently while having the support of your peers. The ideal candidate will have a background in HES and will have a proven sales record with previous experience growing a line of business. This position may be located at our corporate headquarters in Sacramento, or in any major city throughout the U.S.
