Presentation Topic: Sustainable Integration: How Packard Children's Hospital Delivered State-of-the-Art MEP in an Architecturally-Integrated Package

The LEED Platinum Packard Children's Hospital combined many project archetypes under one roof (IPD environment, multi-phase project, sustainable and patient-centered design). Join Mazzetti, Perkins + Will and HGA as project team members walk attendees through the completed hospital with a focus on architecturally-integrated MEP systems and the design and planning implications from both an architecture and engineering standpoint.

- Identify specific ways Packard Children's Hospital balances advanced MEP systems with aesthetic considerations
- Specify methodologies that deliver an enhanced patient experience throughout the hospital
- Understand key design choices that earned the hospital LEED Platinum status
- Learn challenges and solutions that the design team had to balance in order to deliver a functional facility dedicated to healing
